

# Lloyd's Rules for the Building & Construction of Yachts

This set of books containing the Rules & Regulations were collected by Theo Rye and passed to the Assn of Yachting Historians to make them more widely available. They will be of particular interest to builders and restorers looking for authenticity in their work. It is not a complete set, although it is not clear when revised versions were published but they are offered in the interest of availability. Two other volumes are included – the ABS Guide for Racing Yachts 1981 and a booklet regarding the use of GRP. Prior to 1889 the rules were included in the Yacht Register – after that they were in separate volumes.

## List of Files Included
